

# AP CALCULUS BC

Teacher Name: Teresa Tarter

Teacher E-mail: [tgtarter@madisoncity.k12.al.us](mailto:tgtarter@madisoncity.k12.al.us)

<b>Course Description:</b>	Advanced Placement (AP) Calculus BC is a continuation of Honors Calculus. The primary focus of the course is preparing students for the AP Calculus BC exam. Topics covered include transcendental functions, techniques of integration, applications of integration, and infinite series. Also, the material from Honors Calculus will be reviewed extensively in preparation for the BC exam. Students are encouraged (but not required) to take the AP Calculus BC exam. College credit at most universities may be earned for Calculus I and Calculus II by scoring a 3, 4, or 5 on the AP Calculus BC exam. Honors Calculus should be taken in the fall of the school year that a student is taking AP Calculus BC.
<b>Course Objectives:</b>	<p>This course continues the study of differential and integral calculus that was begun in Honors Calculus. The primary aims of the course are to help students develop new problem solving and critical reasoning skills and to prepare them for further study in mathematics, the physical sciences, or engineering. By the end of the course, students should be able to:</p> <ul style="list-style-type: none"><li>• apply integration to several types of physical problems;</li><li>• differentiate, integrate, and solve problems with exponential, logarithmic, and inverse trigonometric functions;</li><li>• use separation of variables to solve simple differential equations and solve applied problems involving Newton's Law of Cooling;</li><li>• compute complicated integrals using a combination of substitutions, algebraic and trigonometric manipulation, partial fractions, and parts;</li><li>• recognize and compute improper integrals;</li><li>• compute volumes of solids using washer, shell, and general cross-section methods;</li><li>• analyze curves given parametrically;</li><li>• calculate area of a region bounded by a polar graph;</li><li>• apply convergence tests to a wide range of infinite series;</li><li>• approximate elementary functions using Taylor polynomials; and</li><li>• determine Taylor and Maclaurin series of a given function.</li></ul> <p>In addition to the specific skill-oriented objectives above, students should</p> <ul style="list-style-type: none"><li>• have improved skills at problem solving and critical thinking: at dissecting a complex problem, determining steps in its solution, finding the solution, and testing whether it is reasonable; and</li><li>• be able to provide clear written explanations of the ideas behind key course concepts/</li></ul> <p>Students should also gain an increased appreciation of mathematics as part of the language of science and as a study in itself.</p>
<b>Textbooks:</b>	<u>Calculus of a Single Variable</u> , 11th ed. Roland Larson and Bruce Edwards, Cengage Learning. Supplement text: <u>Calculus: Graphical, Numerical, Algebraic</u> . Finney, Demana, Waits, Kennedy, Pearson Prentice Hall, 2003
<b>Grading Policy:</b>	<p>Grades are based on a 100-point scale. We have two types of grades: daily grades (30% of final grade) and tests (70% of final grade). The percentage-based grading scale is as follows: A (90-100), B (80-89), C (70-79), D (65-69), and F (below 65). Grades are a reflection of mastery of the standards. Make sure all absences are excused as class work can be made up and graded for excused absences only.</p> <p>Cheating/plagiarizing will be handled by the teacher at teacher discretion</p>

<b><i>Classroom Expectations:</i></b>	You are expected to conduct yourself in a respectful and productive manner. In addition to all the rules and expectations listed in the student handbook, I expect you to have a positive attitude, treat others with respect, practice self-discipline, and demonstrate responsibility. If these conditions are not met, you can expect one-on-one meetings with me, parent/instructor conferencing, and administrative action, if necessary.
<b><i>Cell Phone Expectations:</i></b>	ALL electronic devices are prohibited from use during the instructional day (from 8:12-3:28). This includes: cell phones, smart watches, earbuds/headphones/airpods, tablets, and personal computers (school issued laptops will be allowed). Discipline will be given to ANY student who uses an electronic device. If you bring your device to school, it MUST be placed in your bookbag. It cannot be on your person.
<b><i>Tardy Policy:</i></b>	Students who are late to ANY class, without a pass, will report to a tardy scanning station. You will input your identification number on the pin pad. A tardy slip will be printed for you to report to class. A parent email will be sent for every tardy. Discipline will be as follows: 3 total tardies will result in 1 day of ISS; 6 total tardies will result in 2 days of ISS; Progressive discipline to follow.
<b><i>Make-up Work Policy:</i></b>	<p>Make-up tests will only be given to a student who has an excused absence. The student must make arrangements with the teacher to take a make-up test. Tests may be taken before school on designated days by the teacher.</p> <p>Homework/Classwork: Students who are absent for excused reasons will be permitted to make up any missed work. It is the student's responsibility to get their work assignments (usually posted in Schoology) and complete the assignments according to a time frame determined by the teacher within two weeks of the date of the last absence. Grades of zero will be assigned for assignments missed because of unexcused absences.</p>
<b><i>Exam Exemption Policy:</i></b>	<p>Any student in grades 9-12 are eligible to earn an exam exemption for the 2025-2026 Exams for each class IF they have earned an 85% or higher as the final grade for that course. Any of the following will EXCLUDE a student from exempting for that class:</p> <ul style="list-style-type: none"> <li>• More than five EXCUSED absences</li> <li>• Any UNEXCUSED absence</li> <li>• In School Suspension (ISS) for 3 days or more</li> <li>• Out of School Suspension (OSS)</li> <li>• One or more days of Alternative School placement</li> <li>• Not participating in the state standardized assessment for their grade level (10th PreACT, 11th ACT with Writing, 12th WorkKeys, and AP exams)</li> </ul> <p>Attendance and full participation in reviews and assignments for the class leading up to the day of the final exam are required.</p>
<b><i>Laptops:</i></b>	Concerning laptop utilization: 1) Student laptops should not be hard-wired to the network or have print capabilities. 2) Use of discs, flash drives, jump drives, or other USB devices will not be allowed on Madison City computers. 3. Neither the teacher, nor the school is responsible for broken, stolen, or lost laptops. 4. Laptops and other electronic devices will be used at the individual discretion of the teacher.

<b>Materials and Supplies Needed:</b>	Students are encouraged to bring graphing calculators to each class. Several TI-84+ graphing calculators are provided for in-class use for those students not owning graphing calculators. Since the calculus AP exams require graphing calculators for some questions, this technology has been extensively incorporated into the curriculum. The instructor will be using a TI-84 graphing calculator and presentation software and therefore will provide assistance with the operation of TI-84 calculators. If a student chooses to use a calculator other than the TI-84, he/she is responsible for learning to operate that device.
<b>Accommodations:</b>	Requests for accommodations for this course or any school event are welcomed from students and parents.
<b>AP Exam:</b>	The AP Calculus exams are scheduled for 8:00 a.m. on Monday, May 11. The fee for an AP Exam is \$100 and should have already been paid at registration.

18 – WEEK PLAN *	
<b>Week 1</b>	Transcendental Functions: Differentiation and Integration of Functions with Bases other than $e$ & Applications
<b>Week 2</b>	Differential Equations: Solving Separable Differential Equations, Growth & Decay, & Newton's Law of Cooling, Slope Fields, & Euler's Method
<b>Week 3</b>	Transcendental Functions: Differentiation & Integration of Inverse Trig Functions
<b>Week 4</b>	Applications of Integration: Calculations of Volumes of Solids, Arc Length, and Areas of Surfaces of Revolution
<b>Week 5</b>	Advanced Integration Techniques: Trigonometric Integration & Integration Using Trig Substitution
<b>Week 6</b>	Advanced Integration Techniques: Integration Using Partial Fractions & Integration by Tables
<b>Week 7</b>	Limits: L'Hopital's Rule Advanced Integration Techniques: Improper Integrals
<b>Week 8</b>	Parametric Equations: Differentiation of Parametric Functions Vector-Valued Functions: Differentiation of Vector-Valued Functions and Calculation of Speed
<b>Week 9</b>	Infinite Series: Sequences, Series & Convergence, The Integral Test, & p-series
<b>Week 10</b>	Infinite Series: Comparisons of Series, Alternating Series, Ratio, & Root Tests
<b>Week 11</b>	Infinite Series: Taylor Polynomials & Approximations
<b>Week 12</b>	Infinite Series: Power Series and Taylor & Maclaurin Series
<b>Week 13</b>	Infinite Series: Maclaurin Series for functions $e^x$ , $\sin x$ , $\cos x$ , and $1/(1-x)$
<b>Week 14</b>	Infinite Series: LaGrange Error Bound for Taylor Polynomials AP Exam Review: In-depth Review of Selected AP Topics in Preparation for AP Exam
<b>Week 15</b>	AP Exam Review: In-depth Review of Selected AP Topics in Preparation for AP Exam
<b>Week 16</b>	AP Exam Review: In-depth Review of Selected AP Topics in Preparation for AP Exam
<b>Week 17</b>	AP Exam Review: In-depth Review of Selected AP Topics & AP Exam
<b>Week 18</b>	Post AP Exam Selected Topics

\*This is a tentative plan and may change at the discretion of the teacher.
